

Application Description

As we know, Skopje is the capital of Macedonia and is visited daily by people from all over Macedonia and from other countries. But it also happens in other cities of Macedonia. Our goal with this web application is to provide users with easy access to all possible eating and accommodation needs in any city in Macedonia, and this will be useful for both the citizens of the city and people visiting it for the first time.

Our application will help people easier find places to rest, nice hotels, best supermarkets, hot meals, it will help to find gas stations coffee shops etc.

Also, the application will offer the most popular hotels, supermarkets, restaurants, coffee shops in the area, also a rating for the whole country.

The most important feature of this application will be that in one place it will offer users all possible necessary information for everyday life in the city in which they are located.
